

To Whom it May Concern,

In the summer of 1998, Ms. Kirstin Green installed a custom mosaic for a fountain backsplash in my backyard pool area. Her design and craftsmanship has made this fountain a centerpiece to the entire area while enhancing the beauty and value of my home.

During the conceptual process Kirstin listened carefully to my objectives and was eager to incorporate some of my ideas into the design, while adding her own artistic flair. Her design solutions yielded a finished piece that is totally unique but also reflective of my tastes. This fountain ties together all the elements of the space, including the pool and deck areas, the landscaping and the overall architectural scheme of the house itself. Part of the genius of her design is that the fountain is not "over-produced" rather has a timeless appeal.

Not only is Ms. Green exceedingly talented, I also enjoyed her organization, efficiency and work ethic. She took on this project with sincere dedication while keeping it on time and on budget. Kirstin took a personal ownership of the installation, which is as important as the lovely design. The fountain had to meet her own high standards and was not entirely finished until she herself was happy with it, too. – the mark of a true artist.

For anyone considering having mosaic work done in your home or business, I would highly recommend Ms. Kirstin Green for the job! You will find her to be a delight to work with and, from personal experience, I can guarantee the end result will be greatly satisfying.

Sincerely,

Lisa Martin
